

Videoconferencing

Save time and money by using the latest in technology to bring deponents, clients, business associates or co-counsel from across the world into a convenient nearby videoconferencing center. One of the very first High Definition Videoconferencing facilities to hit Colorado is now in our Denver headquarters office.

We offer both IP and ISDN videoconferencing in both our large conference room (can accommodate 24 to 30 persons) and our medium conference room (can accommodate 8 persons).

You will save all the travel time and costs by conducting a deposition, business meeting or interview via videoconferencing.

We also offer state-of-the-art video streaming over the internet. See and hear any proceedings taking place in a remote location from your office, your home, or from any computer with access to the internet. Use instant messaging to confer with co-counsel, experts, paralegals, or anyone you give access to the video stream.

Call us today with your request and we will take care of the details.
